Warehousing & Drumming

Chemicals

Services

Drumming

Our modern filling systems for liquid products enable us to offer you a tailor made solution for all your packaging inquiries.

Our state of the art semi-automatic filling lines can be used very flexible to meet all your requirements for ADR goods but also GMP+ or HACCP filling is possible.

All our filling activities will be done very efficient direct from a tank truck into the needed packaging.

Warehousing

With 10,000 pallet of storage capacity, our ultra-modern hazardous materials warehouse at Vivochem can be your partner for outsourcing your stocks.

The latest technology on automatic warehousing combined with a full track & trace system ensures you to have full control on the logistical status and stocks of your goods 24/7.

More and more regulatory requirements are being placed for the safe handling of hazardous products. These challenges are our daily business.

You can use our experience and knowledge so that we can help you in solving your to storage requirement. At Vivochem safety is always the top priority

Logistic

Vivochem can be your full service partner SO besides Drumming and warehousing we can also offer all needed logistic services. We offer a wide range of value-added services.

These services include:

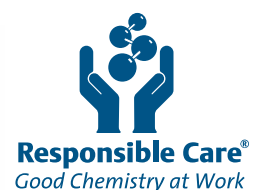

- Delivery all over Europe by road (from 1 pallet up to full trucks)
- Intermodal transport
- Worldwide shipments by container service to almost any international seaport.
- Customs clearance , additional documents service (EUR 1 / ATR / CVO)
- Incoming & outgoing quality control on your goods.
- Sampling your goods.

Chemical Distribution

In addition to the drumming and warehousing services Vivochem is a chemical distributor we do have good contacts in almost every sector of the chemical industry.

Vivochem has all the requirement resources to be your European business hub & logistic partner
